

Full range of skips, roll on roll off containers, enclosed containers, wheelie bins, rear end loaders. Any type of skip supplied on request and a licensed waste transfer/recycling facility.

THE COMPANY

With over 30 years solid experience in the waste industry, the family owned company is now one of the largest privately owned waste management/recycling companies in Britain.

In support of the governments waste hierarchy, the companies mid/long term disposal strategy is a shift away from landfill to waste recycling and minimisation,

therefore in 2000, Pink Skips invested £2.5 million in a new state of the art material recovery facility (MRF) at Rock Road to sort waste material for recycling of which now up to 80% is processed for further use.

On the strength of this modern facility the company has been awarded numerous contracts with high profile organisations, local authorities, blue chip construction and building companies and general businesses that are keen to participate in recycling programmes to demonstrate their commitment to the environment.

As a result of our recycling activities we can provide secondary aggregates ie screened or crushed hardcore.

Constant appraisal of market trends and a continuing investment in research and development are at the core of Pink Skips successful leadership in the market place.

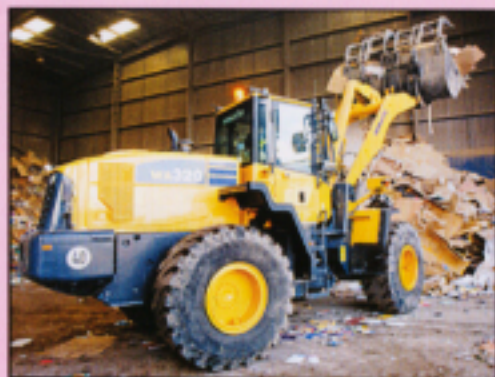

For further information on how our company can help you meet our new government guidelines and ensure that you are compliant with the latest legislation, contact:

Pink Skips, Recycling House, Rock Road, Ketley, Telford, Shropshire TF1 5HW
